

RELY ON EXCELLENCE

M461CL-E3

Mechanical Seals | Agitator seals | Liquid lubricated seals

Features

- Retrofit for JC Type 109 / Type 109B
- Cartridge double seal for top entry drives
- For glass lined vessels
- With integrated floating bearing
- Liquid lubricated
- Self-closing on product side
- For stepped and unstepped shafts
- Unbalanced
- Independent of direction of rotation
- Multiple springs rotating

Advantages

- Ready-to-fit and factory-tested unit
- The M461CL-E3 will remain closed even during pressure variations or pressure reversal. Operation is possible with buffer fluid ($p_{1max} = 6 \text{ bar (87 PSI)}$) or pressurized with barrier fluid as double seal.
- The seal can be lifted off the glass-lined flange as a complete cartridge. The sensitive glass lined basic flange remains mounted on the vessel.
- Can be applied at higher pressure and rotating speed than specified by DIN.
- Made of stainless steel, no protective coating required

Operating range

Shaft diameter:
 $d1 = 40 \dots 125 \text{ mm (1.57" \dots 4.92")}$

Pressure:
 $p1 = \text{vacuum} \dots 10 \text{ bar} (\dots 145 \text{ PSI})$
 $p3 = \text{max. } 12 \text{ bar (174 PSI)}$

Temperature:
 $t1 = -40 \text{ °C} \dots +200 \text{ °C}$
 $(-40 \text{ °F} \dots +392 \text{ °F})$

Sliding velocity:
 $vg = 0 \dots 3 \text{ m/s (0 \dots 9.8 ft/s)}$

For applications beyond this range, please inquire.

! It should be noted that the extremal values of each operating parameter cannot be applied at the same time because of their interaction.

Materials

Seal faces: Carbon graphite (B), FDA compliant
 Seats: Silicon carbide (Q1), FDA compliant
 Secondary seals on product side: KL/M5
 Secondary seals on atmospheric side: V
 Springs: G
 Metal parts: E (1.4122)
 Parts in contact with product: Al-oxide (Buke5)

Standards and approvals

- FDA
- ATEX
- DIN 28138 (mechanical seals for agitators)
- DIN 28136 T3 (for glass lined vessels)
- DIN 28137 T2 (flange connections for glass lined vessels)
- DIN 28159 (shaft end for glass lined vessels)
- Compliant to TA Luft (German Clean Air Act)

Recommended applications

- Petrochemical industry
- Chemical industry
- Pharmaceutical industry
- Food and beverage industry
- Agitators
- Reactors

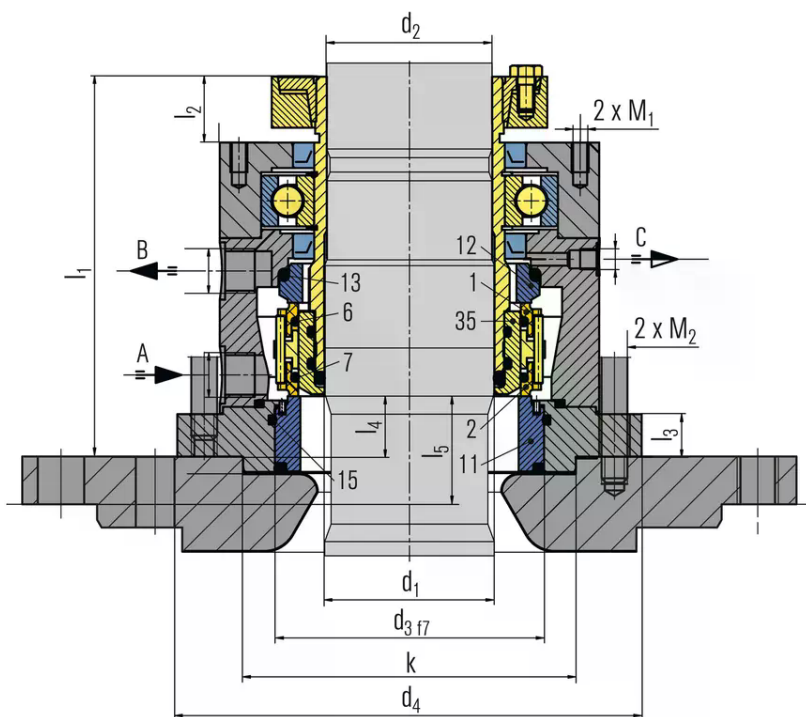

Recommended piping plans

Closed circuit EagleBurgmann TS system, open circuit EagleBurgmann SPA, EagleBurgmann SPN
