

RELY ON EXCELLENCE

Rotatherm Tape 0902

Packings & Gaskets | Packing for valves

Features

Rotatherm tape 0902 is nuclear grade pure graphite tape (purity $\geq 99.85\%$). It is suitable for sealing or packing valve spindles during servicing. They are used to quickly and easily create working packing rings inside the valve

Advantages

- Do not harden
- Long service life
- Uncomplicated installation and removal

Operating range

Temperature

- Continuous operation:
 $t = -200\text{ °C} \dots +500\text{ °C}$

Chemical resistance:

pH = 0 ... 14

Resistant to almost all organic and inorganic acids, alkalis, oils and solvents.

Standards and approvals

- BAM (upon request)

Recommended applications

- Chemical industry
- Petrochemical industry
- Oil & gas industry
- Process industry
- Pharmaceutical industry
- Power plant technology
- Building services engineering

Components

- Valves
