## BuraTAL-Flex 6224

Packings & Gaskets | Packings for valves

### Features

BuraTAL-flex 6224 is a diagonal braided packing made from a combination of Aramid and PTFE yarns with special impregnation. 6224 is the preferred choice for valves, especially low emission applications.

### Advantages

- Low leakage rates
- Emission certificate
- Good pressure and extrusion resistance
- Low friction
- Suitable for quick repair service

### Operating range

Pressure:  $p = 300 \text{ bar}$

Sliding velocity:  $vg = 2 \text{ m/s}$

Temperature

- $t = -100 \text{ °C} \dots +280 \text{ °C}$

Chemical resistance:

pH = 0 ... 14

Density:  $1.6 \text{ g/cm}^3$

### Standards and approvals

- TA-Luft
- ISO 15848

### Recommended applications

- Process industry
- Petrochemical industry
- Chemical industry
- Refineries
