

RELY ON EXCELLENCE

Packing extractor 9611

Packings & Gaskets | Tools Maintenance products

Advantages

- Easy to handle
- Reduces the time taken to replace gaskets
- Protects the shaft during packing changes

Operating range

- Safe and easy removal of the old packing when required

Features

The non-twisting, bendable, tension and compression-resistant form of the packing extractor 9611 allows packings to be gripped perfectly and removed without leaving anything behind, even in inaccessible stuffing box chambers. This special tool is ideal for removing compression packings from pumps, agitators, valves, fittings etc.
