

RELY ON EXCELLENCE

Pump packing cutter 9612

Packings & Gaskets | Tools Maintenance products

Advantages

- No material wastage
- Quick and easy to use
- Creates a precise butt joint

Operating range

For cutting packing cords to length with a straight cut, max. packing cross-section: 25mm

Features

The packing cutter 9612 is an easy to use special tool for cutting rings into lengths. It is used for packing rings for shaft diameters up to 110 mm, depending on the packing cross-section. An extension scale for shaft diameters up to 250 mm is also available.

Functional description

Precisely set the required packing length by moving a stop along the scale. Then clamp the packing cord in place and cut to length with a knife.
