

RELY ON EXCELLENCE

Valve packing cutter 9616

Packings & Gaskets | Tools Maintenance products

Advantages

- No material wastage
- Quick and easy to use
- Creates a precise butt joint

Features

The packing cutter 9616 is an easy to use special tool for cutting rings into lengths. The packing cutter is used to cut packing rings to size with a slanted cut for valves, mixers and kneaders with a cut length of up to 460 mm. For cutting packing cords to length with a slanted cut, max. packing cross-section: 20mm

Functional description

Precisely set the required packing length by moving a stop along the scale. Then clamp the packing cord in place and cut to length with a knife.
