

RELY ON EXCELLENCE

DRE Pressure control unit

Seal Supply Systems | Components

Advantages

- Suitable for hydraulic oil
- Max. flow rate 23 l/min.
- Max. setting pressure of up to 160 bar

Recommended applications

- Chemical industry
- Petrochemical industry
- Refining technology
- Oil and gas industry

Features

The pressure control unit is used for setting different levels of barrier pressure when supplying several individual mechanical seals via an SPA with a VTE. There is a choice of four basic types.

Installation, details, options

Product variants

Designation	Max. setting pressure	Max. flow rate (l/min.)	Measuring range
DRE025	25 bar (362 PSI)	23	0 ... 25 bar
DRE050	50 bar (725 PSI)	23	0 ... 60 bar
DRE100	100 bar (1,450 PSI)	23	0 ... 100 bar
DRE160	160 bar (2,320 PSI)	23	0 ... 160 bar
