

RELY ON EXCELLENCE

SP23 Temperature gauge

Seal Supply Systems | Instrumentation

Features

The bi-metallic thermometers of the SP23 range are used for visual monitoring of the operating temperature.

Advantages

- Analog temperature gauge: indicator range up to 120°C
- Available in size NG63
- Parts in contact with the medium are made of 1.4571: excellent media resistance for aggressive liquids
- Wide range of applications throughout the processing industry

Recommended applications

- Process industry

Installation, details, options

Product variants

Designation	SP23-093	SP23-153-00
Temperature measuring range		
0 °C ... +120 °C	■	
0 °C ... +200 °C		■
Size		
NG63	■	
NG100		■
Proximity contact acc. to NAMUR		
MIN temperature		■
Explosion protection		
Category	II 2 G D	II 2 G D
Type of protection		ia
Temperature class	TX	T1-T6
Material		
Wetted parts	1.4571 / 1.4301	1.4571

Please inquire about other measurement ranges and about thermometers with contacts.
